

MARK SIEGMUND

BP - Global Wells Organization
Senior Subsea Engineer and Wells Reliability Advisor

With a BSc in Petroleum Engineering from the University of Louisiana Lafayette, Mark has gained over thirty years of both Subsea Production & Deepwater Well Engineering experience both domestically and internationally. For the last 20 years, Mark's has been employed by BP where he has held Subsea leadership roles in projects and operations and is a recognized Subject Matter Expert on the application of Subsea & Wells Reliability Engineering.

Mark is currently a member of BP's Rig Engineering team where he provides leadership & expert advice on Subsea and Wells reliability issues both internally and externally. Within Industry, Mark has been both a chairman and now co-chair of the API RP 17N Steering Committee for Subsea Reliability and Technical Risk management, and is chairman of the Well Expert Committee's BOP Reliability Task Force within the International Oil and Gas Producers Association (IOGP). In January 2016, Mark was elected to chair the oversight committee for the newly launched BOP Performance JIP which is focused on improving the reliability of Well Control systems.
