**Brian McShane**

**Senior Vice President, INTECSEA Americas**

Brian McShane currently serves as Senior Vice President of the Americas region, and is responsible for all consultancy, engineering and execution support services associated with floating hulls, subsea and pipeline systems. He has over 25 years of experience in engineering, construction and project management of subsea, pipelines and field developments within the oil and gas industry.

Brian also has extensive experience in leading engineering and project execution programs for various offshore project developments and environments including Deepwater, Arctic, environmentally sensitive, remote and technically challenging arenas. Brian has a strong background in technology and strives to implement the latest industry capability to enable projects and enhance operational performance.

Brian holds a Diploma in Engineering Management, from Bristol University England and both a BA and MA honors degree in Engineering from Cambridge University England.
